## Claudia Vásquez Gómez. Beeldend kunstenaar uit Chili.

### **Performance. "Camouflaje".**

Measures and duration, variable. Paradise Bay and Fildes Bay. Antarctica. 2012. Photography, Constanza Cabrera. Costume Design, Ana Lopez.

### **Introduction**

"Since 2006 Claudia has developed several creative pieces which have been nourished by the research of Francisco Valera G. (Chilean neurobiologist, philosopher and Buddhist meditator. 1946-2001). Specifically, the notions of impermanence, memory and experience have been decisive for the material, conceptual and contextual development of his work.

The intuitive, conceptual and physical crossings that he establishes between the visual arts, biology, international studies and dance, give way to his creative process and subsequent development of site-specific works. These works are understood as organic living beings, which only have the possibility of happening, based on the interdependent relationship between their parts, that is, between form, content and context.

His works seek to create poetic acts that invite us to travel beyond thoughts, to a place where it is possible to experience the notions of place and moment, just as an instant of time."

### **Latest work**

My next project is entitled "Camino a Monte Grande: a propósito de Francisco Varela". It corresponds to a Land art and urban art intervention, which will be carried out in the Region of Coquimbo, North of Chile, between the months of January and February of the year 2024.

Project is founded by FONDART 2021. National Fund for the Development of the Arts. Ministry of Culture, Arts and Heritage. Government of Chile.
