Highlights

In Memory

Carlo Heip (68), *Affiliated professor* CEES (MarBEE) and Emeritus Director of NIOZ passed away on 15 February 2013 following a short illness. Carlo was an engaged intellectual who combined vision and leadership in marine sciences within The Netherlands and Europe. He played a pivotal role in the worldwide study of marine biodiversity. Carlo was associated with CEES for 12 years during which time he served as promotor for seven PhD students. We remember him as a generous friend and warm person.

Dissertations granted by CEES in 2013

R. Beukema	Biodiversity in rubber agroforests Promotores: Prof. dr. J. van Andel, Prof. dr. M. Werger Copromotor: Dr. M. van Noordwijk
C.J. Camphuijsen	A historical ecology of two closely related gull species (laridae): multiple adaptions to a man-made environment Promotor: Prof. dr. T. Piersma
S. Cretoiu	Metagenomics-guided exploration of natural habitats for bacterial chitinases Promotor: Prof. dr. J.D. van Elsas
S. Donadi	Bivalve loops. The importance of ecosystem engineering for soft-bottom intertidal ecosystems. Promotores: Prof. dr. B.K. Eriksson, Prof. dr. J.L. Olsen
F. Encinas Viso	Ecology and evolution of mutualistic networks Promotores: Prof. dr. R.S. Etienne, Prof. dr. H. Olff
C.X. Garzón López	Determinants of the spatial distribution of treespecies in an neotropical forest Promotores: Prof. dr. H. Olff, Prof. dr. S. Bohlman
M. van der Geest	Multi-trophic interactions within the seagrass beds of Banc d'Arguin, Mauritania. A chemasynthesis-based intertidal ecosystem. Promotores: Prof. dr. T. Piersma, Prof. dr. J. van der Meer, Prof. dr. H. Olff
M. Hammers	Ecology of senescence in a cooperatively breeding bird. A long-term study on the Seychelles warbler Promotor: Prof. dr. ir. J. Komdeur, Prof. dr. T. Burke Co-promotor: Dr. D.S. Richardson
B. de Jong	Testosterone, a female hormone - Testing the function and evolution of testosterone in female birds Promotores: Prof. dr. J. Komdeur, Prof. dr. T. Groothuis, Prof. dr. L. Lens (Ghent University, Belgium)
A.L.W. Kuijper	Sexual selection and sex allocation Promotores: Prof. dr. I.R. Pen, Prof. dr. F.J. Weissing
Q-X. Liu	Emergent properties of spatial self-organization. A study of patterned mussel beds Promotores: Prof. dr. J. v.d. Koppel, Prof. dr. P.M.J. Herman, Prof. dr. H. Olff

X. Liu	Interspecific and intraspecific perspectives of the Janzen-Connell effect. Incorporating phylogenetic and molecular evolutionary approaches Promotores: Prof. dr. R.S. Etienne, Prof. dr. S. Yu
T. Lok	Spoonbills as a model system. A demographic cost-benefit analysis of differential migration. Promotores: Prof. dr. T. Piersma, Prof. dr. J.M. Tinbergen
K. Meijer	Native versus non-native: The interplay between native insects and non-native plants Promotores: Prof. dr. M. Schilthuizen, Prof. dr. L.W. Beukeboom Copromotor: Dr. C. Smit
M.D.C. Pereira e Silva	The normal operating range of soil functioning. Understanding the natural fluctuations of nitrogen cycling communities Promotor: Prof. dr. J.D. van Elsas
A.L.D. van der Plas	Understanding trait-based community assembly in tropical savannahs at different trophic levels Promotor: Prof. dr. H. Olff
K. Reiss	Marine trophic cascades: synergistic effects of fishing and eutrophication Promotor: Prof. dr. J.L. Olsen
Elske van der Vaart	A Cognitive Model of Caching by Corvids Promotores: Prof. dr. C.K. Hemelrijk, Prof. dr. L.C. Verbrugge
R. Veeneklaas	Adaptation and dispersal of native invasive salt-marsh species <i>Elytrigia atherica</i> Promotores: Prof. dr. J.P. Bakker, Prof. dr. R. Bijlsma

CEES PhD students in 2013

T. Aghajanzadeh	<i>Ecophysiology of Plants / Razi Med. Diag. Lab Iran</i> Volatile sulfur compounds released by Brassica species as biofungicides in crop production
A. Alzate Vallejo	<i>COCON</i> The impact of spatial structure and species diversity on the evolution of local adaptation
S.M. Amini Nasab	<i>BESO / Univ. Behbahan, Iran</i> Individual variation in parent and offspring fitness in blue tits: the role of parental effects and environmental variables
P. van den Berg	<i>Theoretical Biology</i> Evolutionary causes and consequences of personality differences in cooperative behaviour
R. Bom	<i>Animal Ecology / NIOZ</i> Cascading predator-prey effects in a pristine seagrass-based food web
V.S. Brauer	<i>Theoretical Biology</i> Effect of temperature on the dominance of N-fixing cyanobacteria
M. Buricova	<i>Evolutionary Genetics</i> Mutagenesis screen for photoperiodic timing genes in <i>Nasonia</i>
M. Busana	<i>BESO</i> Influence of demographic and social environment on individual behavioural phenotypes and fitness
A.A. Cabrera	<i>MarECon</i> Evolutionary Ecology of Marine Mammals
M. Chaib De Mares	<i>Microbial Ecology</i> Enhancing our understandinig of the ecology of selected sponges - The key role of bacteria
L. Cornacchia	<i>COCON</i> The role of organism traits in self-organization of river vegetation
L. Cortes Tolalpa	<i>Microbial Ecology</i> Metagenomic mining of microbial communities and enzymes involved in lignocellulose breakdown
E. Dalla Benetta	<i>Evolutionary Genetics</i> Molecular genetic regulation of the <i>Nasonia</i> circadian and seasonal clock

H.C. de Paoli	<i>Community and Conservation Ecology</i> Key processes in the restoration of mussel beds in the Wadden Sea
W. Diao	<i>Evolutionary Genetics</i> Genetics and genomics of presyngotic isolation in <i>Nasonia</i>
M. Dillen	<i>COCON</i> The interplay of biodiversity and environmental stress for ecosystem functioning
F. Dini Andreote	<i>Microbial Ecology</i> Microbial succession in salt marsh: The ecological and functional properties of communities
D. Ekkers	<i>Theoretical Biology</i> Experimental evolution of bacterial populations
E.M. El Hacen	<i>COCON</i> Do nutrients derived from birds drive the food web of Banc d'Arguin, Mauritania?
K. Fietz	<i>MarECon</i> The adaptive capacity of pelagic apex predators: The case of the Eastern Tropical Pacific scalloped hammerhead shark, <i>S. lewini</i>
R. Fokkema	<i>Animal Ecology</i> Family planning under social competition
W. Fokkema	<i>Community and Conservation Ecology</i> Brent geese in the Waddensea: coupling individuals' habitat use to species influence on (meta)ecosystem functioning
J. de Fouw	<i>Animal Ecology / NIOZ</i> Pervasive impact of intertidal migrant top predators on species diversity and size structure of its prey may lead to spatial knock-on effects between ecosystems
S. Gerritsma	<i>Evolutionary Genetics</i> Identifying genomic variation among natural <i>Drosophila melanogaster</i> populations and its association to immunological resistance against parasitoids
J. van Gestel	<i>Theoretical Biology</i> The eco-evo-devo of biofilm formation
E. Geuverink	<i>Evolutionary Genetics</i> Genetics of sex determination in haplodiploid wasps

M.C.W.G. Giesbers	<i>Evolutionary Genetics</i> Genetics of adaptation: mating behaviour and reproductive strategies in <i>Nasonia</i> wasps
M.K. Gopala Krishnan	<i>Microbial Ecology</i> Studying the diversity of plant-associated bacterial communities in pioneer arcto-alpine plants
S. Grizard	<i>Animal Ecology</i> How microbes shape bird eggs
F. Groenewoud	<i>BESO</i> The cost of helping and the expression of individual phenotypes in cooperative breeders
I.U. Haq	<i>Microbial Ecology</i> Bio-indicators for soil health
R.A. Howison	<i>Community and Conservation Ecology</i> Plant-plant interactions along biotic & abiotic stress-gradients at salt marshes
O.J. Ivanov	<i>Theoretical Biology</i> Network design and the response of complex systems to stress and deterioration
K.M. Jalvingh	<i>Evolutionary Genetics</i> Genetic stress responses of <i>Drosophila</i> species in relation to their geographic distribution and population dynamics
T. Janzen	<i>COCON</i> The origin and maintenance of biodiversity
D.J. Jimenez Avella	<i>Microbial Ecology</i> Metagenomics in the degradation of lignocellulosic substrates
J. Jouta	<i>Animal Ecology</i> Food webs of the Wadden Sea
S. Jurburg	<i>Microbial Ecology</i> Bio-indicators for soil health
M. Langenhof	<i>BESO</i> Surviving in a changing world: The effects of early-life conditions on determining an individual's behavior and adaptive response later in life
L. Lv	<i>BESO</i> Influence of nest dismantling and migratory behaviour on territory take-over in hair-crested drongos

W.J. Ma	<i>Evolutionary Genetics</i> Ecology and mechanisms of sex determination in the <i>asobara</i> genus (hymenoptera: braconidae)
C.A. Mallon	<i>Microbial Ecology</i> Understanding the effects of bacterial diversity on community functioning and stability
R. Marfull	<i>BESO</i> Begging responses in a social and environmental context in blue tits
M. Marutha Muthu	<i>Microbial Ecology</i> Strategies for improved bioprospection
J. Mwangi	<i>Animal Ecology</i> Predation, infection and protection: how to enhance survival in birds at a highly fragmented highland grassland
A. Nakauma	<i>Theoretical Biology</i> The evolution of the bacterial chemotaxis network
H. Ndithia	<i>Animal Ecology</i> Seasonal dynamics of reproductive strategies and disease in tropical grassland birds living in habitats highly threatened by land use change
J. Onrust	<i>Animal Ecology</i> Earthworm availability as key for the presence of wintering, migrating and breeding meadow birds
T. Oudman	<i>Animal Ecology / NIOZ</i> Pervasive impact of intertidal migrant top predators on species diversity and size structure of its prey may lead to spatial knock-on effects between ecosystems
J. Ouwehand	<i>Animal Ecology</i> Possibilities and constraints in life-cycle adaptation to climate change
J. Prodic	<i>Evolutionary Genetics</i> Genetic basis of cyclical life-history and behavioural traits in <i>Nasonia</i>
P.E. Puentes Téllez	<i>Microbial Ecology</i> Adaptation of <i>E. coli</i> to heterogeneous conditions
A.E. Quiñones Paredes	<i>Theoretical Biology</i> The evolution of eusociality

M. Reich	<i>Ecophysiology of Plants</i> Metabolic control of nutrient use efficiency at a whole plant perspective in a changing global atmosphere
J. Rouhana	<i>Evolutionary Genetics</i> Evolutionary genomics of the enigmatic sex peptide: a male 'master regulator' of female reproduction
D.R. Ruthrauff	<i>Animal Ecology</i> On the frozen edge: environmental and physiological constraints in the life history of a northerly-wintering shorebird
L. Salazar Jaramillo	<i>Evolutionary Genetics</i> Comparative genomics of parasitoid resistance in <i>Drosophila</i> spp.
J. Samplonius	<i>Animal Ecology</i> Adaptation to climate change in a migratory passerine
A. Schlaich	<i>Animal Ecology</i> Surviving in changing agricultural landscapes in Europe and Africa - Investigating habitat use of Montague's harriers along an intensification gradient
L. Schmaltz	<i>Animal Ecology</i> Comparative demography of Ruff and Golden Plover
A. Sharma	<i>Evolutionary Genetics</i> Testing theories of sex determination and sex chromosome evolution with houseflies
M.A. SidiCheik	<i>Community and Conservation Ecology</i> Historical , annual and seasonal dynamics of seagrass meadows at Banc d'Arguin (Mauritania): the foundation of a fragile ecosystem
J. Spoelder	<i>HLB Laboratory / Ecophysiology of Plants</i> Endophyte communities in potato and their relationship with the host plant
H.P.J. van Veelen	<i>Animal Ecology</i> Effects of environmental microbial diversity and pathogenic pressure on immune investment in birds
M.P. Veldhuis	<i>Community and Conservation Ecology</i> Interactions among nutrient loops in African savannas
L. van Walraven	<i>Animal Ecology / NIOZ</i> Natural and anthropogenic impact on North Sea gelatinous zooplankton population dynamics: implications for ecosystem structure and functioning

M. Wang	<i>Microbial Ecology</i> Plant-bacterial interactions along a primary succession chronosequence in a salt marsh ecosystem
J. van der Woude	<i>BESO</i> Fitness consequences of intra-specific competition and social stress in the Seychelles warbler
Y. Wu	<i>Evolutionary Genetics</i> The birth and infancy of new sex chromosomes - Do neo-sex chromosomes arise from conflict between the sexes?
H.-Y. Yang	<i>Animal Ecology / NIOZ / Beijing Normal University</i> Foraging ecology of red knots staging in Bohai Bay China
P. Yang	<i>Microbial Ecology</i> The mechanisms of interaction between bacteria and fungi in soil and rhizosphere
N. Yu	<i>Ecophysiology of Plants</i> The role of receptor-like kinases in salt-induced changes or root architecture in <i>Arabidopsis thaliana</i>
E. van der Zee	<i>Animal Ecology / NIOZ</i> A regime shift in benthic organisms in the Wadden sea: causes and consequences for higher trophic levels
M. Zhang	<i>Microbial Ecology</i> Bacterial-fungal interactions in soil and the role of plasmids

PhD Projects – Theses in preparation

Y. Afeworki	<i>Marine Biology (Ocean Ecosystems)</i> Seasonal dynamics in the trophic ecology and energetics of an important grazer (the parrot fish <i>Scarus ferrugineus</i>) on the coral reefs of Eritrea in the Southern Red Sea
A.I. Bijleveld	<i>Animal Ecology / NIOZ</i> Cost-benefit analyses of flocking in shorebirds, with a focus on information exchange
C. Burger	<i>Animal Ecology</i> Latitudinal dispersal as solution to insufficient adaptation to climate change
X. Du	<i>Community and Conservation Ecology</i> Progress in neutral theory for ecological communities
S. Duijns	<i>Animal Ecology / NIOZ</i> Foraging ecology of the Bar-tailed Godwit, <i>Limosa lapponica</i>

K. Elschot	<i>Community and Conservation Ecology</i> Biotically created vegetation heterogeneity during early primary succession on salt marshes
R. Kentie	<i>Animal Ecology</i> Spatial demography of Black-tailed Godwits: Metapopulation dynamics in a fragmented agricultural landscape
F.S. Mandema	<i>Community and Conservation Ecology</i> Biodiversity and nature management on mainland saltmarshes
L. Molleman	<i>Theoretical Biology</i> Human cooperation - the role of prosocial norms
I.A. Neven	<i>Ecophysiology of Plants</i> Inorganic carbon uptake of Southern Ocean Pacific phytoplankton in a high-CO ₂ world
S. Nolte	<i>Community and Conservation Ecology</i> Biodiversity and nature management on mainland saltmarshes
S. Paolucci	<i>Evolutionary Genetics</i> The genetic basis of variation in reproductive diapause in <i>Nasonia</i> wasps
S. Perez Vila	<i>Evolutionary Genetics</i> Ecology and evolution of fly parasitoid communities
M. Poortvliet	<i>Marine Benthic Ecology and Evolution</i> Population connectivity and dispersal in devil rays in the tropical Pacific
I. Puga-Gonzalez	<i>BESO / Theoretical Biology</i> Self-organization of social behavior in primates
J.L. Ruifrok	<i>Community and Conservation Ecology</i> How herbivores create landscape mosaics of different plant functional types in temperate ecosystems
M.W. Smith-Kleefsman	<i>Evolutionary Genetics</i> Determinants of metapopulation dynamics: stochastic processes versus adaptation
R. van Klink	<i>Community and Conservation Ecology</i> Biodiversity and nature management on mainland saltmarshes
E. van Velzen	<i>Community and Conservation Ecology</i> The interplay between speciation, dispersal and adaptation to local conditions in a heterogeneous environment, and its effect on food web/community structure

Highlights

In 2013 our intensive long-term population study of Black-tailed godwits in Friesland celebrated its 10-year anniversary. The outreach activities around this study grew strongly through the project Kening fan 'e Greide (Frisian for: King of the Meadows). The satellite tracking of individual godwits during their spring migration from Spain to the Netherlands attracted a lot of media attention and public involvement. Furthermore, our combined research and conservation activities in close collaboration with local volunteers and farmers was important in the successful bid for Leeuwarden as Cultural Capital of Europe in 2018.

Flycatcher team member Rob Bijlsma was awarded the Edgar Doncker-award for Nature Conservation by the Edgar Doncker-foundation, because of his formidable contribution to research and conservation of raptors. Rob Bijlsma's most recent book (*Mijn Roofvogels*) was in the top-10 of best-selling non-fiction books in the Dutch book stores.

PhD student Almut Schlaich participated in the prize winning team of the Academische Jaarprijs 2013, which was led by the Amsterdam (UvA) ecologists Judy Shamoun-Baranes and Willem Bouten. This award for popularizing science in the Netherlands will be used to create an app (*Vogel het uit*) to gather habitat information of individually tracked birds using GPS-loggers. This citizen science project is enrolled this year, and also includes other bird species studied by the Animal Ecology Group.

Three PhD-students were awarded their PhD under supervision of Animal Ecology Group members:

Camphuijsen, C.J. (2013): A historical ecology of two closely related gull species (*Laridae*) - Multiple adaptations to a man-made environment. Promotor: prof.dr. T. Piersma; co-promotor: dr. H.W. van der Veer

Lok, T. (2013): Spoonbills as a model system - A demographic cost-benefit analysis of differential migration. Promotores: prof. dr. T. Piersma, prof. dr.J.M. Tinbergen (cum laude)

Van der Geest, M. (2013): Multi-trophic interactions within the seagrass beds of Banc d'Arguin, Mauritania - A chemosynthesis-based intertidal ecosystem. Promotores: prof. dr. T. Piersma, prof. dr. J. van der Meer, prof. dr. H. Olff

Publications

Doctorate granted by the institution, prepared within the institution

Highlights

Opening of the new Dutch Science Facility on the Antarctic Peninsula

In January 2013, delegates from NWO and the ministry of Foreign Affairs opened the new Dutch Science Facility at the British Antarctic research base Rothera (see picture). The opening of the labs in Antarctica received much attention in the Dutch press: on television, radio and in national and local newspapers. An overview of all publicity can be found on the website of the Willem Barentsz Polar Institute: <http://wbpi.webhosting.rug.nl/index.php?nr=207>

Rothera base is situated at the west side of the Antarctic Peninsula, where currently large effects of global warming are apparent. Our project *Temporal dynamics of the climate gas dimethyl sulphide (DMS) and related compounds in a changing Antarctic sea-ice environment* is one of the five Dutch projects at Rothera and will run until 2016. Members of the Plant Ecophysiology group, Jacqueline Stefels, Maria van Leeuwe and Desiree den Os, form one of the main Dutch teams at Rothera, working on year-round measurements of climate gases and incubation experiments designed to measure biological process rates of climate relevant compounds. The data will serve to develop algorithms for sea ice-ocean-climate models.

Highlights

In September 2013 we organised a mini-symposium on "Exotic Plants and Adaptable Insects" in conjunction with the promotion of Kim Meijer. With this promotion we completed a successful collaboration with Menno Schilthuizen (Naturalis) who had been holding the Uyttenboogaart-Eliasen Foundation funded chair in insect biodiversity in CEES from 2007-2012.

We were very successful in obtaining grants for several new Phd students. Three new positions are within the Marie Curie ITN network "INsecTIME" for research on photoperiodism and diapause in *Nasonia*. A sandwich PhD position was obtained with the University of East Anglia on evolutionary genomics of the enigmatic sex peptide in *Drosophila*. Former PhD student and postdoc in our group, Eveline Verhulst, obtained a personal VENI grant from The Netherlands Organisation for Scientific Research (NWO) to continue her research on hymenopteran sex determination at Wageningen University.

We were invited for editing a special issue of *Sexual Development* on sex determination and differentiation in insects to which we contributed three articles. Our review article on invitation entitled "Polyploidy in animals: effects of gene expression on sex determination, evolution and ecology" was published in a special issue of *Cytogenetics and Genome Research* on "Trends in Polyploidy Research in Animals and in Plants". We contributed a review chapter on prezygotic isolation in the parasitoid wasp genus *Nasonia* to the book *Speciation: Natural processes, genetics and biodiversity* (P. Michalak, ed., Nova Science Publishers, Inc).

Highlights

Prof. Jeanine Olsen (MarBEE) and collaborators were awarded best paper of 2013 by the journal *Systematics and Biodiversity* for their time calibrated phylogeny of the seagrass family Zosteraceae.

Northern hemisphere species diverged ~ 4.6 mya consistent with the opening of the Bering Sea and dispersal into the Atlantic. Further diversification of *Zostera marina*, the overwhelmingly dominant species in the Atlantic, occurred ~1.6 mya. This study in combination with earlier phylogeographic studies shows that *Z. marina* has survived numerous Pleistocene glacial-interglacial cycles making it an important model for understanding plasticity and adaptation to climate warming along Atlantic coastlines.

Coyer, J.A., Hoarau, G., Kuo, J., Tronholm, A., Veldsink, J. and Olsen J.L. 2013. Phylogeny and temporal divergence of the seagrass family Zosteraceae using one nuclear and three chloroplast loci. *Systematics and Biodiversity* 11: 271-284. <http://dx.doi.org/10.1080/14772000.2013.821187>

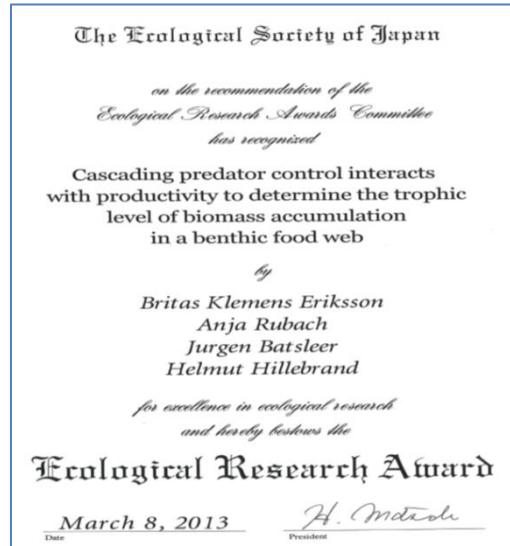

Prof. Britas Klemens Eriksson (MarBEE) received the Ecological Research Award 2013 from the Ecological Society of Japan for his paper on cascading predator control and its interactions with productivity to determine the trophic level of biomass accumulation in a benthic foodweb.

He and collaborators found that both the number of trophic levels (two vs. three) and the life-stage development of the producer trophic level determine the propagation of trophic cascades in benthic systems. Results also supported the hypothesis that predators interact with resource availability to

determine food-web structure. Understanding which food web properties contribute to the resilience of ecosystem functions are essential as globalization and intensification of human impacts increase.

Eriksson, B.K., Rubach, A., Batsleer, J., Hillebrand, H. 2012. Cascading predator control interacts with productivity to determine the trophic level of biomass accumulation in a benthic food web.

Highlights

On February 26th, 2013, prof. dr. Palsbøll gave his inaugural lecture entitled "*In silico* versus *in vivo* reality; the molecular ecology and conservation genetics of marine mammals". The lecture was preceded by an introduction by prof. dr. Jeanine Olsen.

The subject of prof. dr. Palsbøll's lecture was aimed at the current limitations in applying population genetic inference methods to conservation issues and how we might solve these restrictions.

Highlights

The Microbial Ecology group has, in 2013, been very successful in attracting two externally-funded projects on 'microbes in action', one on the 'minimal efficient biodegradative consortia acting on lignocellulosic waste (NWO/FAPESP, collaboration with Brazil), and another one on the microbiological potential of marine sponges (BluePharmtrain, EU-MC).

In November 2013, Silvia Cretoiu successfully defended her PhD thesis on 'Metagenomics of chitin-amended soils'.
