

Sustainability Calculation Tool

A sustainability analysis of the KEI-week

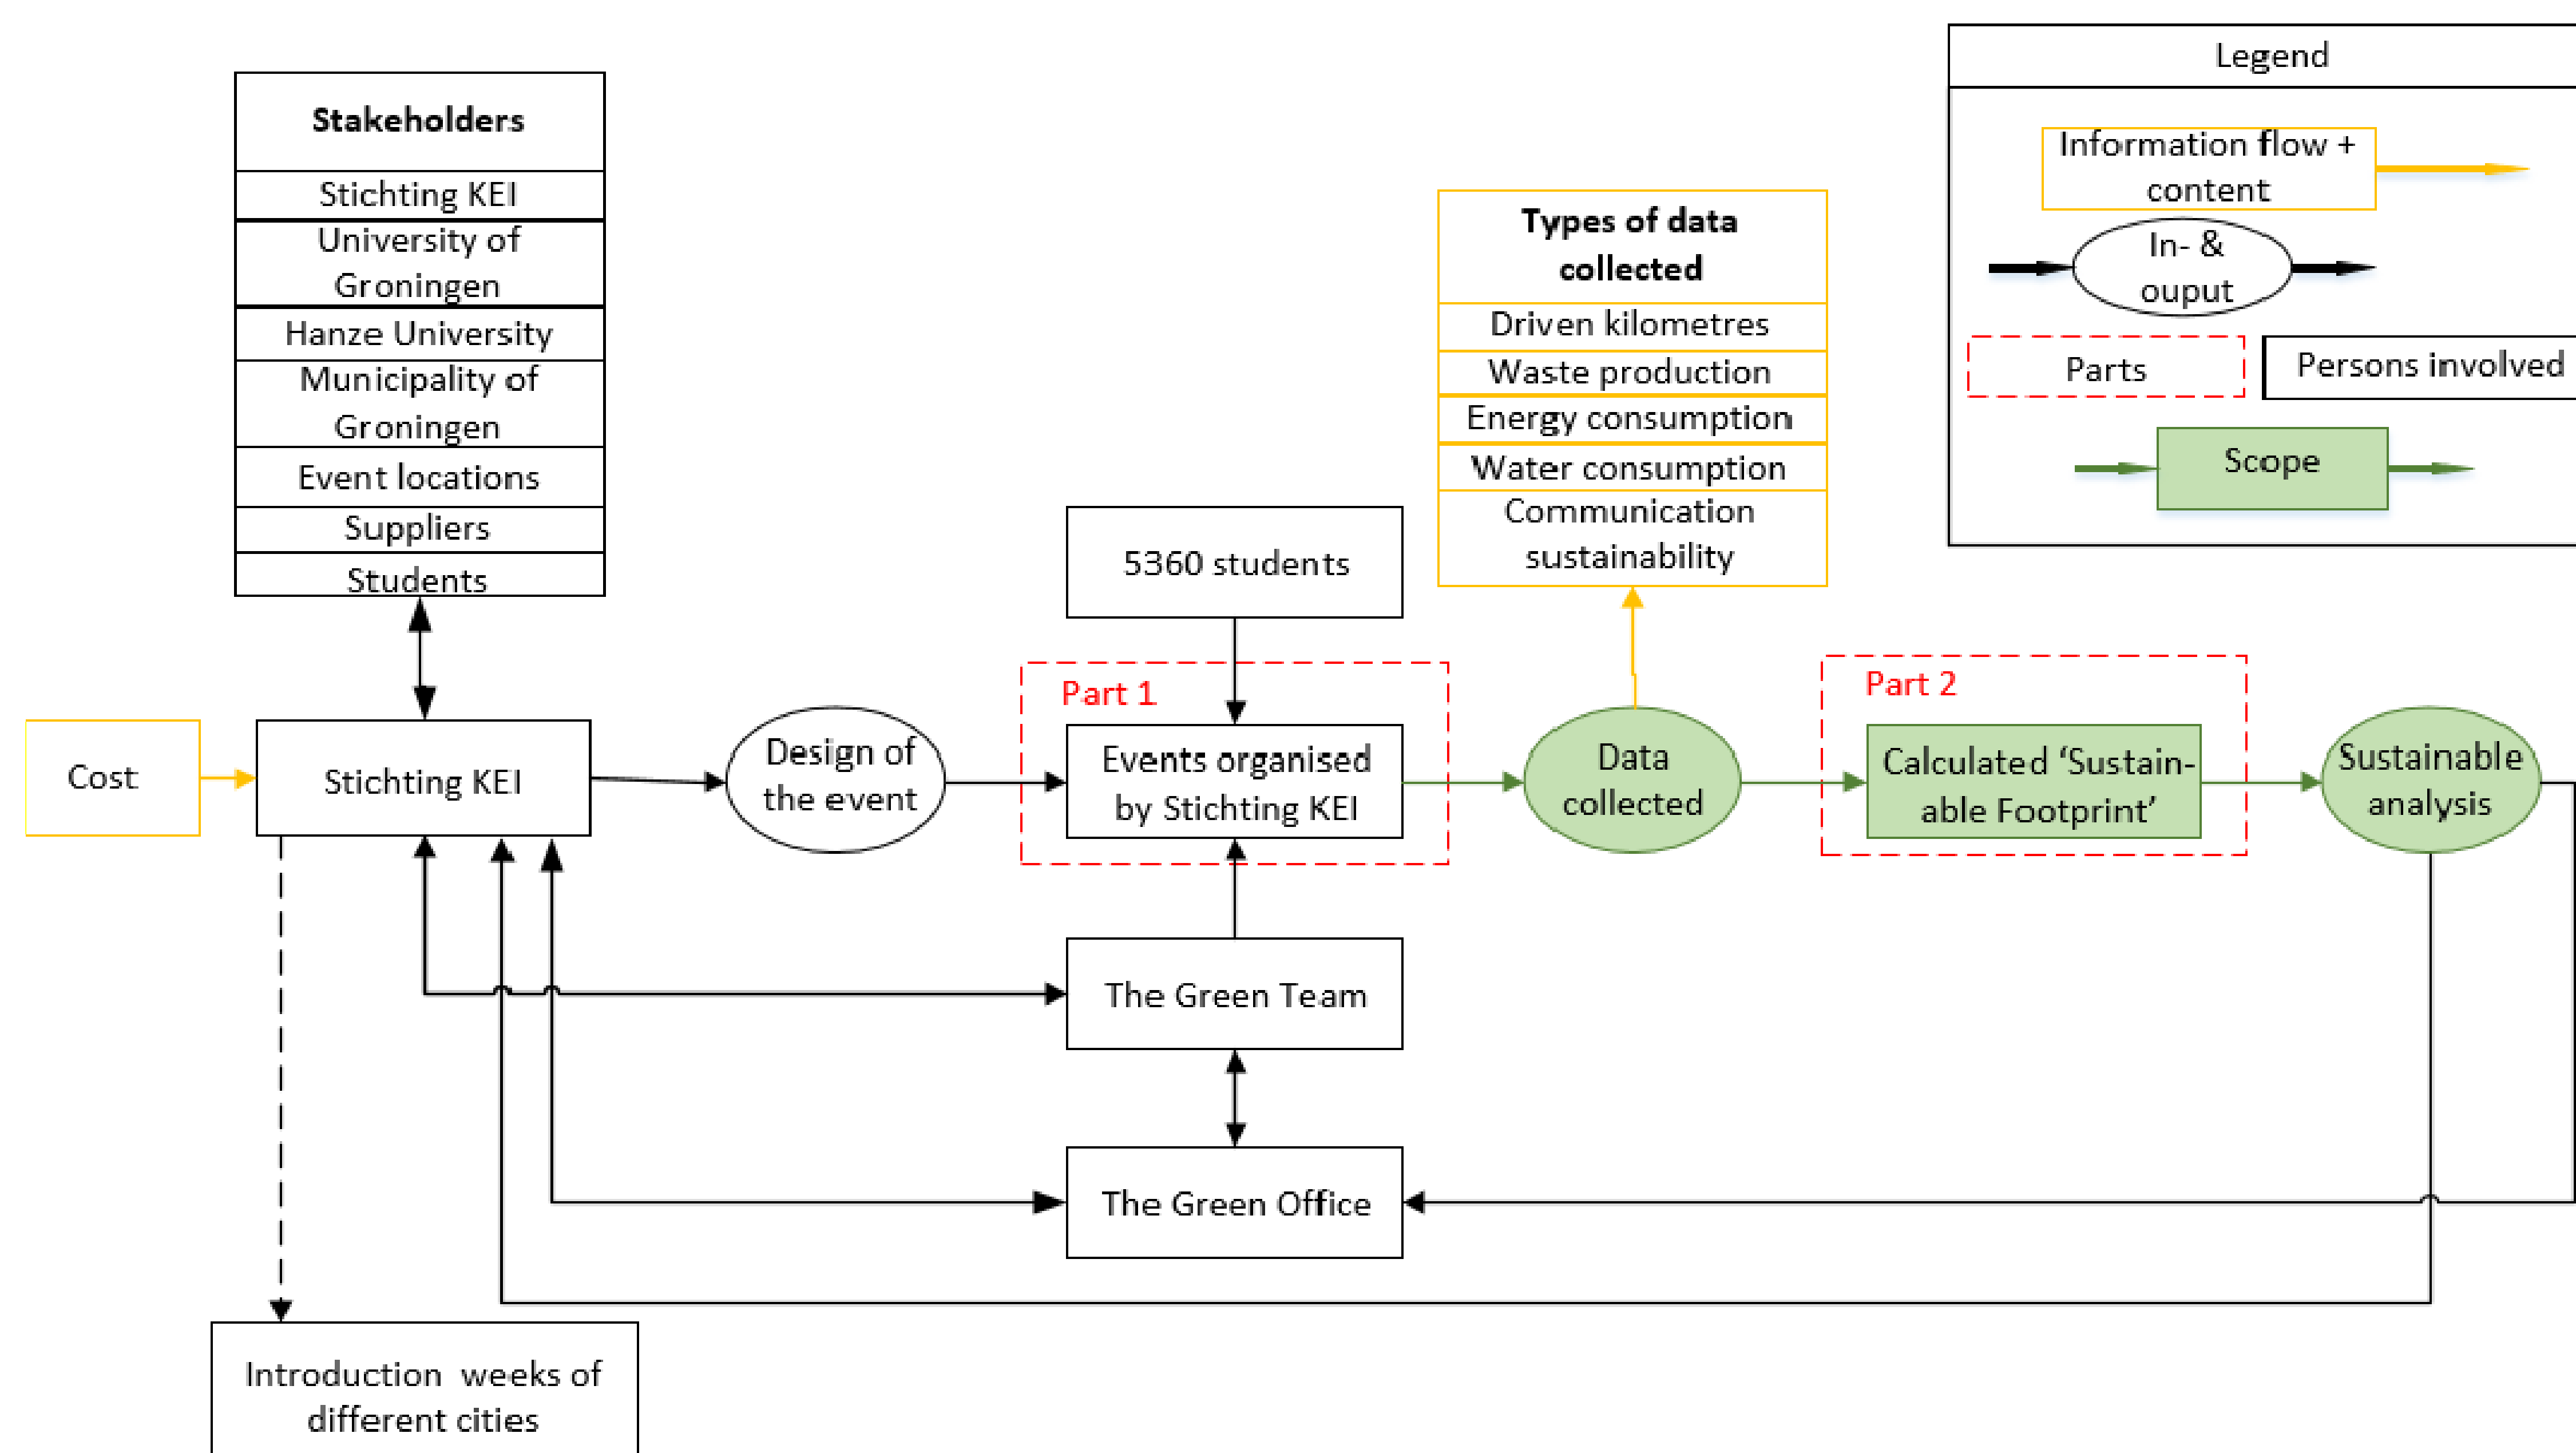

Research: Carlijn
Stokvis

Green Office &
KEI-WEEK

How to make the general introduction week more sustainable:

1. First year of measurements
2. Data management, designing a calculation tool
3. Input for a roadmap to lower the sustainable impact.

Conclusions:

- creating more awareness towards their participants.
- possibilities to lower energy by using less “diesel driven transportation vehicles”
