

## CURRICULUM VITAE

ARTHEMY V. KISELEV

◇ Title: dr., docent (dr. hab.)  
◇ First name: Artemiy (Arthemiy) ◇ Initials: A. V.  
◇ Surname: Kiselev  
◇ Date and place of birth: 5 April 1978, Ivanovo, Russia ◇ Gender: M  
◇ Nationality: Russian  
◇ Address for correspondence: Bernoulli Institute for Mathematics, Computer Science and  
Artificial Intelligence, University of Groningen,  
P. O. Box 407, 9700 AK Groningen, The Netherlands  
◇ Telephone: +31(0) 50 363-32451 ◇ Fax: +31(0) 50 363-33800  
◇ E-mail: A.V.Kiselev@rug.nl  
◇ Website: <http://www.rug.nl/staff/a.v.kiselev>

### Education: master.

University/College of Higher Education: Moscow State University, Russia, 1995–2001  
Date: 31 January 2001  
Study/main subject: Mathematical physics  
Diploma: SUMMA CUM LAUDE  
(all grades ‘excellent’)  
University/College of Higher Education: Independent University of Moscow, Russia  
Term: 1995–1999.

### Education: doctorate.

University/College of Higher Education: Moscow State University, Russia  
Date: 22 April 2004  
Title of thesis: Methods of geometry of differential equations in  
analysis of integrable models of field theory  
Supervisor: prof. dr. I. S. Krasil’shchik  
Reading committee: prof. dr. V. V. Sokolov, prof. dr. A. V. Samokhin  
Speciality: 01.01.03 – Mathematical physics

### Teaching and research title: docent (habilitation)

Awarded by: Ministry of Education, Russia  
Date: 16 December 2009  
Chair: Higher mathematics.

### Current employment (permanent since 1 January 2017).

Jan 2017–now: **Assistant professor** with tenure (UD1),  
Jan 2011–Dec 2016: Tenure-track **Assistant professor** (UD2),  
Bernoulli Institute for Mathematics, Computer Science and Artificial Intelligence,  
Nijenborgh 9, 9747 AG Groningen, The Netherlands.

### Work experience since completing the PhD (all fixed-term).

Dec 2009 – Aug 2012: **Associate professor (Docent** with title and PhD promotion  
status),

Dec 2007 – Dec 2009: **Associate professor**,  
 Sep 2005 – Dec 2007: **Assistant professor** (50%-time equivalent; 344 lecture hrs/year),  
 Department of Higher Mathematics, Ivanovo State Power University (ISPU), Rabfakovskaya str. 34, Ivanovo, 153003 Russia.  
 Jan 2008 – Dec 2010: **Postdoctoral researcher** (fte), Mathematical Institute, Utrecht University, P.O.Box 80.010, 3508 TA Utrecht, The Netherlands.  
 Apr – Sep 2007: **Postdoctoral researcher** (fte), Department of Mathematics and Statistics, University of Montréal, CP 6128 centre-ville, Montréal, Québec, H3C 3J7 Canada.  
 Nov 2005 – Apr 2006: **Postdoctoral researcher** (fte), Department of Physics, Middle East Technical University (METU), Ankara, 06531 Turkey.  
 Sep 2004 – Jun 2005: **Postdoctoral researcher** (fte), Dept. Mathematics, Brock University, 500 Glenridge ave., St. Catharines, Ontario, L2S 3A1 Canada.  
 Aug 2004 – Dec 2006: **Scientific researcher** (50%-time equivalent), Institute for Modelling and Computer Experiment, Ivanovo State Power University (ISPU), Rabfakovskaya str. 34, Ivanovo 153003, Russia.  
 Jun – Jul 2004: **Researcher** (fte), Department of Matematics ‘Ennio De Giorgi’, University of Lecce, Via per Arnesano, 73100 Lecce, Italy.

**Visiting positions:**

Nov 2022 – Jan 2023: IHÉS, Bures-sur-Yvette, France.  
 Nov – Dec 2019: IHÉS, Bures-sur-Yvette, France.<sup>1</sup>  
 Apr – May 2017: IHÉS, Bures-sur-Yvette, France.<sup>2</sup>  
 Jan – Mar 2017: Max Planck Institute for Mathematics, Bonn, Germany.  
 Nov – Dec 2016: IHÉS, Bures-sur-Yvette, France.<sup>2</sup>  
 Oct 2013: Bogolyubov ITP NAS, Kiev, Ukraine.  
 Mar – May 2013: IHÉS, Bures-sur-Yvette, France.  
 Feb – Mar 2011: IHÉS, Bures-sur-Yvette, France.  
 Nov 2009: Max Planck Institute for Mathematics, Bonn, Germany.  
 Apr 2009: Centre de Recherches Mathématiques, Montréal, Canada.  
 Nov – Dec 2008: IHÉS, Bures-sur-Yvette, France.  
 Jun 2008, Jun 2010: SISSA, Trieste, Italy.  
 Feb – Mar 2007: Utrecht University, The Netherlands.  
 Nov – Dec 2006: IHÉS, Bures-sur-Yvette, France.  
 Sep – Nov 2006: Max Planck Institute for Mathematics, Bonn, Germany.  
 Jul 2006: Brock University, St. Catharines, Ontario, Canada.  
 Jun – Aug 2002, Jun – Jul 2003: University of Salerno, Italy (INTAS YS).  
 Apr – May 2003: University of Lecce, Italy (INTAS YS).  
 Nov 2002: University of Twente, Enschede, The Netherlands (INTAS YS).

**Scholarships, grants, and prizes:** 20.

**IHÉS:** Visitor grants 2006, 2008, 2011, 2013, 2016,<sup>2</sup> 2017,<sup>2</sup> 2019,<sup>1</sup> 2022 (Institut des Hautes Études Scientifiques, Bures-sur-Yvette, France), supported by NOKIA FUND in 2019, 2023.

**Teacher of the Year 2018/19** in (Applied) Mathematics: University of Groningen, NL.

**MPIM:** Visitor grants 2006, 2009, 2017 (Max Planck Institute for Mathematics, Bonn, Germany).

<sup>1</sup>In 2019, I was the only visitor invited to the IHÉS from the Netherlands. (Source: IHÉS Annual report 2019, pp. 38–39)

<sup>2</sup>In both 2016 and 2017, I was the only visitor invited to the IHÉS from the Netherlands. (Source: IHÉS Annual report 2017, pp. 35–36)

Jan 2008 – Dec 2010: **NWO VENI** postdoctoral grant 639.031.623, Utrecht University, The Netherlands.<sup>3</sup>

Feb – Mar 2007: **NWO** Visitor grant B61–609, The Netherlands.

Nov 2005 – Apr 2006: **TUBITAK** Postdoctoral research grant, NSF, Turkey.

Jun – Jul 2004: University of Lecce visitor grant 650 CP/D 31/05/2004.

Mar 2002 – Feb 2004: **INTAS** grant YS 2001/2 033.

Sep 2002 – Aug 2003: **PhD scholarship** 3645/5 of the Government of Russia.

Sep 1999 – Jan 2001: **Lomonosov scholar** at the Lomonosov MSU.

Jan – Dec 1996: **ISSEP** grant 96-s1656.

### Member of Editorial Board

- *Open Communications in Nonlinear Mathematical Physics* (OCNMP): since March 2021.
- *Journal of Nonlinear Mathematical Physics* (JNMP): 15 Aug 2016 – 30 Sep 2020.

**Referee** in *Ann. Phys.*, *Math. Annalen*, *J. Math. Phys.*, *J. Math. Anal. Appl.*, *Int. J. Mod. Phys. A*, *SIGMA – Symmetry, Integrability and Geometry: Methods and Applications*, *J. Geom. Mech.*, *J. Lie Theory*, *Nuovo Climento B*, *Acta Appl. Math.*, *Indag. Math.*

**Research interests:** Mathematical physics, combinatorial topology, geometry of interaction, geometry of differential equations, integrable systems, BV- and deformation quantization, Lie algebras, Poisson geometry, graph theory, visualization.

### Brief summary of research over the past five years:

- During the first year of Covid-19, knowledge transfer was a natural aim, see [84–85] and [86–87] (audiocourses), also [80]. Both courses [84–85] are unique in NL.
- During the second year of Covid-19, I designed two new courses [78–79], supervised three lengthy projects ([4, 44] and [10] on p. 11) and supervised the final stage of a PhD dissertation (660 pages, see pp. 10–11 below).
- Jointly with my team [5, 32] I expressed the Kontsevich associative  $\star$ -product up to  $\bar{o}(\hbar^4)$  and, in [1], the affine  $\star_{\text{aff}} \bmod \bar{o}(\hbar^7)$  for affine Poisson brackets (e.g., Kirillov–Kostant linear brackets on  $\mathfrak{g}^*$ ) and its reduction – by using the Jacobi identity – to  $\star_{\text{aff}}^{\text{red}} \bmod \bar{o}(\hbar^7)$  with only rational coefficients but without  $\zeta(3)^2/\pi^6$ . The associativity mechanism of  $\star_{\text{aff}} \bmod \bar{o}(\hbar^7)$  is contrasted in [54] with the easy factorization – via the Jacobi identity – of the associator for  $\star \bmod \bar{o}(\hbar^6)$ . The graphs in expansion  $\star \bmod \bar{o}(\hbar^4)$  are drawn in [44] using the algorithm from [76].
- By combining elements of Gel’fand’s calculus of singular linear integral operators with algebraic technique of Kontsevich’s weighted graphs, I lifted the procedure of deformation quantisation  $\cdot \mapsto \star_{\hbar}$  from finite-dimensional Poisson manifolds to the construction of associative, not necessarily commutative star-products  $\star_{\hbar}$  in unital algebras of local functionals – for field theory models equipped with variational Poisson structures [31].
- Together with my team and using technique from [5, 32], I proved that the ratio  $1 : \frac{6}{2}$  is the only balance at which the Kontsevich two-component tetrahedral flow does preserve the space of Poisson bi-vectors on any finite-dimensional affine manifold [9, 60]. The pentagon-wheel flow is obtained in [30]. The heptagon-wheel cocycle in the graph complex is presented in [8, 59]. The orientation morphism that sends graphs to Poisson cocycles is explained in [27, 57].
- The class of Nambu–determinant Poisson bi-vectors  $\mathcal{P} = \mathbf{d}\mathbf{a}/\mathbf{d}\mathbf{vol}(\mathbf{x})$  on  $\mathbb{R}^3$  and  $\mathbb{R}^4$  is stable under the Kontsevich tetrahedral  $\gamma_3$ -flow and (on  $\mathbb{R}^3$ ) under the pentagon-wheel flow [4]; the  $\gamma_3$ -flows over  $\mathbb{R}^3$  and  $\mathbb{R}^4$  are Poisson-cohomology trivial (for  $\mathbb{R}^3$ , a

<sup>3</sup>Project page: <http://www.nwo.nl/onderzoek-en-resultaten/onderzoeksprojecten/i/49/3249.html>

trivializing vector field is realised in [55] by 11 connected directed micro-graphs that resolve the volume element against Casimir(s); for  $\mathbb{R}^4$ , by 27 micro-graph pairs, skew w.r.t. the Casimirs).

- I verified the main properties of the Batalin–Vilkovisky Laplacian and Schouten bracket within a variational extension [7, 34] of the Kontsevich formal noncommutative symplectic supergeometry to infinite jet spaces for maps of the free algebra quotients over the linear relation of equivalence under cyclic shifts to sheaves of associative algebras of walks on affine manifolds.

- 
- I proved that the construction of the Batalin–Vilkovisky (BV) Laplacian  $\Delta$  does not require *post hoc* regularisation (e.g., using  $\delta(0) := 0$  for the Dirac  $\delta$ -function) and I justified the relation of  $\Delta$  to the variational Schouten bracket ([64] and [33,61]).
  - I defined Lie algebroids over spaces of infinite jets of sections in vector bundles and obtained their representation through homological evolutionary vector fields [12]. This gives a variational Lie algebroid interpretation of the variational noncommutative Poisson structures [34], evolutionary BRST-differential [67], and zero-curvature representations [10] (the space of gauge automorphisms for the quantum BV-cohomology groups is endowed with the structure of classical Lie algebroid [10, 64]).
  - Gardner’s deformations of the  $N=2$  super-KdV [6,11,13], Krasil’shchik–Kersten [62], and (Kaup–)Boussinesq [18,20] equations were constructed (this solves P.Mathieu’s Open Problem 2); the concept of adjoint systems was introduced in [18, 63].
  - I found the representations of  $N$ -ary generalizations for Lie algebras (the Schlessinger–Stasheff homotopy Lie algebras) in spaces of higher-order differential operators. For functions in many variables, I defined analogues of Wronskian determinants that satisfy the  $N$ -ary Jacobi identities [36].
  - I described in [14,22] the higher symmetry algebras of the 2D Toda chains associated with the root systems of complex semi-simple Lie algebras: the commutation relations between the generators are calculated explicitly [70].
  - New multi-supersoliton solutions that are subject to nonlinear superposition, but collide as point particles or decay spontaneously, were obtained in [16] for the  $N = 2$  supersymmetric Korteweg–de Vries equations.
  - I obtained new spiral minimal surfaces using geometric and topological methods [17,35,72].

### International activities.

#### *Invited talks and colloquia.*

- ★ Jul 1–5, 2024: Conference ‘Integrable systems & quantum symmetries’, ČVUT Prague, CZ.
- Jun 30, 2023: Symposium ‘A bridge between Lie theory and Integrable systems’, Utrecht, NL.
- Nov 28–29, 2022: ‘Combinatorics & arithmetic for Physics: special days’, IHÉS, Bures-sur-Yvette, France.
- Jun 5–10, 2022: Workshop ‘Poisson geometry, Lie groupoids and differentiable stacks’, Banff (BIRS), Canada (hybrid; joint talk given on-site by R. Buring).
- Jun 25, 2021: Symposium ‘Fundamentals of the Universe’ (Astro–Math–Phys), University of Groningen, NL.
- Sep 2020: Invited lecture at National Mathematics Symposium ‘Searching for shapes’, Groningen, NL. (event cancelled due to Covid-19)
- Nov 6–8, 2019: ‘Combinatorics & arithmetic for Physics: special days’, IHÉS, Bures-sur-Yvette, France.
- Jul 1–5, 2019: Geometry & Quantum Theory cluster (GQT) conference, Den Dolder, NL.

- Sep 16–22, 2018: ‘Homotopy algebras, deformation theory and quantization’, Bedlewo, Poland.  
 Sep 22, 2017: Colloquium day ‘Graphs, deformations & singularities’, Institut für Mathematik, Johannes Gutenberg–Universität Mainz, Germany.  
 Jul 3–7, 2017: Geometry & Quantum Theory cluster (GQT) conference, Den Dolder, NL.  
 Feb 14, 2017: Invited lecture at National Mathematics Symposium ‘Back to the roots’, Utrecht University, NL.  
 Dec 24–27, 2013: Invited lecture at Conf. Young Sci. ‘Problems of Theoretical Physics’, Bogolyubov ITP Kiev, Ukraine.  
 Jan 16–17, 2009: 37th Seminar ‘Sophus Lie’, University of Paderborn, Germany.  
 Dec 13–15, 2006: Twente 2006 Conference on Lie Groups, University of Twente, NL.  
 Jun 7–8, 2005: CMS workshop ‘Formal geometry of PDE and Integrability’, Brock University, Canada.

***Talks at conferences and workshops.***

- 2003:** ‘Current Geometry’, Naples, Italy.  
**2004:** ‘Nonlinear Physics: Theory and Experiment III’, Gallipoli (Lecce), Italy.
  - ‘Physics of fundamental interactions’, ITEP, Moscow, Russia.
  - ‘Differential Geometry and its applications’, Charles Univ., Prague, Czech Republic.**2005:** 6th Conference ‘Symmetry in nonlinear mathematical physics’, Kiev, Ukraine.
  - ‘Supersymmetry and quantum symmetries’, Dubna, Russia.**2006:** ‘Nonlinear Physics: Theory and Experiment IV’, Gallipoli (Lecce), Italy.
  - Workshop ‘Quantization, Dualities, and Integrable Systems’, Pamukkale Univ., Denizli, Turkey.
  - ‘Differential Geometry and its Applications’, Odessa, Ukraine.
  - ‘Symmetries and Overdetermined Systems of PDE’, IMA, University of Minnesota, USA.**2007:** 7th Conference ‘Symmetry in nonlinear mathematical physics’, Kiev, Ukraine.
  - Conference ‘Dynamics and Hamiltonian systems’, Utrecht University, The Netherlands (attended).
  - The J. McKay conference on Groups and Symmetries, University of Montréal, Canada (attended).**2008:** ‘Nonlinear Physics: Theory and Experiment V’, Gallipoli (Lecce), Italy.
  - Workshop ‘Integrability in the AdS–CFT correspondence’, Utrecht University, The Netherlands (attended).
  - 4th Int. Workshop ‘Group analysis of differential equations and integrable systems’, Protaras, Cyprus.
  - Workshop ‘Integrable systems in Quantum Theory’, Lorentz Centre, Leiden, The Netherlands (attended).**2009:** 8th Conference ‘Symmetry in nonlinear mathematical physics’, Kiev, Ukraine.
  - ‘Supersymmetry and quantum symmetries’, JINR, Dubna, Russia.
  - Workshop ‘Geometric aspects of Quantum Theory and Integrable systems’, University of Amsterdam, The Netherlands (attended).**2010:** ‘Nonlinear Physics: Theory and Experiment VI’, Gallipoli (Lecce), Italy.
  - Workshop ‘The interface of Integrability and Quantization’, Lorentz Centre, Leiden, The Netherlands.
  - Dutch Mathematical Congress, Utrecht, The Netherlands (attended).
  - 5th Int. Workshop ‘Group analysis of differential equations and integrable systems’, Protaras, Cyprus.

- Conference ‘Geometry and Quantum Theory’, Nijmegen, The Netherlands (attended).
- 2011:** Workshop ‘Quantum Theory and Symmetries’, Prague, Czech Republic.
  - ‘The Legacy of deformation quantization’, Ascona, Switzerland (attended).
  - ‘Supersymmetry and quantum symmetries’, JINR, Dubna, Russia.
  - Workshop ‘Special functions and orthogonal polynomials of Lie groups and their applications’, Děčín, Czech Republic.
- 2012:** Int. Workshop ‘Noncommutative algebraic geometry and its applications to Physics’, Lorentz Centre, Leiden, The Netherlands.
  - 6th Int. Workshop ‘Group analysis of differential equations and integrable systems’, Protaras, Cyprus.
- 2013:** ‘Physics and Mathematics of nonlinear phenomena’, Gallipoli (Lecce), Italy.
  - ‘Integrable systems & quantum symmetries’, CVUT Prague, Czech Republic.
  - ‘Symmetries of discrete systems & processes II’, CVUT Děčín, Czech Republic.
  - ‘Supersymmetry and quantum symmetries’, JINR, Dubna, Russia.
  - Int. workshop ‘Symmetry & integrability of equations of Mathematical Physics’ in honour of prof. W. Fushchych, IM NAS Kiev, Ukraine.
  - Jubilee workshop ‘Nonlinear Mathematical Physics: 20 Years of JNMP’, Sophus Lie Centre, Nordfjordeid, Norway (poster).
  - Int. Conf. ‘Quantum groups & quantum integrable systems’, ITP Kiev, Ukraine (poster).
- 2014:** 7th Int. Workshop ‘Group analysis of differential equations and integrable systems’, Larnaca, Cyprus.
  - Int. workshop ‘Integrability & isomonodromy in Mathematical Physics’, Lorentz Centre, Leiden, The Netherlands (attended).
- 2015:** ‘Integrable systems & quantum symmetries’, CVUT Prague, Czech Republic.
  - ‘Supersymmetry and quantum symmetries’, JINR, Dubna, Russia.
  - ‘Physics and Mathematics of nonlinear phenomena’, Gallipoli (Lecce), Italy (peer-selected, event overlapped with ISQS’23 in CVUT Prague).
- 2016:** ‘Integrable systems & quantum symmetries’, CVUT Prague, Czech Republic.
  - 50th Seminar ‘Sophus Lie’, Bedlewo, Poland (poster).
- 2017:** ‘Integrable systems & quantum symmetries’, CVUT Prague, Czech Republic.
  - ‘Symmetries of discrete systems & processes IV’, CVUT Děčín, Czech Republic.
  - ‘Supersymmetry and quantum symmetries’, JINR, Dubna, Russia.
  - ‘Physical Mathematics’ (Arbeitstagung 2017) in honor of Yu. Manin, MPIM Bonn, Germany (attended).
  - ‘Resurgence & quantisation’, IHÉS, Bures-sur-Yvette, France (attended).
- 2018:** 32nd International colloquium on group theoretical methods in Physics (GROUP32), Prague, Czech Republic.
  - Int. workshop ‘Homotopy algebras, deformation theory and quantization’, Bedlewo, Poland.
  - Int. workshop ‘Symmetries & integrability of equations of Mathematical Physics’, IM NAS Kiev, Ukraine (invited).
- 2019:** ‘Integrable systems & quantum symmetries’, CVUT Prague, Czech Republic.
  - ‘Supersymmetry and quantum symmetries’, Yerevan, Armenia.
  - ‘Problems of Theoretical & Mathematical Physics’, IM & Bogolyubov ITP NAS Kyiv, Ukraine.
  - The 2nd JNMP conference on Nonlinear Mathematics Physics, Santiago, Chile (poster).

**2020:** 10th Int. Workshop ‘Group analysis of differential equations and integrable systems’, Kiev, Ukraine (event cancelled).

- ‘Integrable systems & quantum symmetries’, CVUT Prague, Czech Republic (event postponed).

**2022:** 34th International colloquium on group theoretical methods in Physics (GROUP34), Strasbourg, France.

- Workshop ‘Poisson geometry, Lie groupoids and differentiable stacks’, Banff (BIRS), Canada (hybrid; joint result presented on-site by R. Buring).
- Int. workshop ‘Symmetries & integrability of equations of Mathematical Physics’, IM NAS Kiev, Ukraine.

**2023:** Symposium ‘Quantum Theory and Symmetries’ (QTS 12), Prague, Czech Republic.

**2024:** ‘Integrable systems & quantum symmetries’, CVUT Prague, Czech Republic.

- 1st meeting ‘Open Communications in Nonlinear Mathematical Physics’, Bad Ems, Germany.

---

**2007:** 1st Montréal industrial problem solving workshop, CRM, University of Montréal, Canada.

**Reports at research seminars:** 130.

- Oberseminar, Max Planck Institute for Mathematics, Bonn, Germany.
- Algebra, Geometry and Physics seminar, MPIM, Bonn, Germany.<sup>4</sup>
- Mathematics seminar, IHÉS, Bures-sur-Yvette, France.
- Deformation theory seminar, University of Pennsylvania, Philadelphia, USA.<sup>5</sup>
- Mathematical physics seminar, CRM, University of Montréal, Canada.
- Mathematical physics seminar, SISSA, Trieste, Italy.
- Colloquium, Geometry & topology, Geometry & Algebra + Geometry & Analysis, and Dynamical Systems / Mathematics of Complex Systems seminars, Mathematical Institute, Utrecht University, The Netherlands.
- Mathematical physics and Representation theory seminars and Math. colloquium, Korteweg–de Vries Institute for Mathematics, University of Amsterdam, The Netherlands.
- Math. colloquium and FMF math-phys colloquium, Algebra<sup>6</sup> and Floris Takens Dynamical systems seminars, Bernoulli Institute for Mathematics, Computer Science & Artificial Intelligence, University of Groningen, NL.
- Quantum gravity seminar, Institute for Mathematics, Astrophysics and Particle Physics (IMAPP), Radboud University Nijmegen, The Netherlands.
- String theory seminar, Spinoza Institute for Theoretical Physics, Utrecht University, The Netherlands.
- String theory seminar, High-Energy Theoretical Physics section, University of Groningen, The Netherlands.
- Mathematical physics seminar, Steklov MI RAS, Moscow, Russia.
- Quantum field theory seminar, I. E. Tamm Theoretical department, Lebedev IP RAS, Moscow, Russia.
- Seminar ‘Geometry of differential equations’, Independent University of Moscow.
- Seminar ‘Lie algebras, Riemannian geometry, and mathematical physics’, Independent University of Moscow, Russia.

---

<sup>4</sup>Talks given in Dec 2008, Dec 2009, Dec 2010, Jan 2012, Feb 2013, Apr 2014, May 2015, July 2016, Nov 2017, and Nov 2018.

<sup>5</sup>Three-talk mini-series in March–April 2022.

<sup>6</sup>Four-talk mini-series in May–June 2022.

- String theory seminar, Bogoliubov Lab for Theoretical Physics, JINR, Dubna, Russia.
- PDE seminar, Landau Institute for Theoretical Physics, Moscow, Russia.
- Geometry & mathematical physics seminar, IM Jussieu, Univ. Paris VII, Paris, France.
- Polynomial systems & Experimental Math seminar, INRIA–Jussieu–IHP, Palaiseau, France.
- Mathematical physics seminar, University of Burgundy, Dijon, France.
- Mathematical physics seminar, University of Lille, France.
- Mathematical physics & algebraic topology seminar, University of Angers, France.
- Department of Mathematical Physics seminar, IM NAS Kiev, Ukraine.
- Mathematical physics seminar, Faculty of Mathematics and Mechanics, Taras Shevchenko National University, Kiev, Ukraine.
- Doppler Institute seminar, Doppler Institute for Mathematical Physics & Applied Mathematics CAS, Prague, Czech Republic.
- Analysis, geometry and string theory colloquium, University of Hannover, Germany.
- Algebraic geometry, topology and number theory colloquium, University of Mainz, Germany.
- Geometry and I-AIM Interdisciplinary Math seminars, University of Toronto, Canada.
- Mathematical physics seminar, Laval University, Canada.
- PDE seminar, McMaster University, Hamilton, Canada.
- Gravity, fields & particles seminar, Faculty of Physics, University of Belgrade, Serbia.
- General Math seminar, University of Luxembourg, Luxembourg.
- Mathematical physics and Geometry & topology seminars, Middle East Technical University, Ankara, Turkey.
- Applied Math and General Math seminars, Dept. of Mathematics, Bilkent University, Ankara, Turkey.
- Geometry seminar, Department of Mathematics, University of Lecce, Italy.

#### **Other academic activities**

- Bernoulli Institute math colloquium co-organizer (RUG).
- Member of the faculty Library committee (RUG, 2017–2023).
- Organizer of Math movie nights: IHÉS, Utrecht, Groningen, ISPU.
- Member of the Geometry & Quantum Theory cluster (The Netherlands, [www.gqt.nl](http://www.gqt.nl)).
- Member of PhD defence committees:
  - Johann Bernoulli Institute for Mathematics & Computer Science (JBI RUG) – 2011, 2013, 2024;
  - Van Swinderen Institute for Particle Physics & Gravity (VSI RUG) – 2018.

**Reviewer** in Mathematical Reviews (AMS).

#### ***Teaching experience:***

- Mar 2001 — Mar 2002: Teaching assistant (Lomonosov MSU, Moscow):
- Analysis-III, Ordinary differential equations (2nd year);
  - Partial differential equations of mathematical physics (3rd year).
- Jul 2002, 2003: Teaching assistant, assistant lecturer (5, 6th Diffiety Schools, Italy):
- Geometry of Differential Equations (PhD students).
- Sep 2004 – Apr 2005: Instructor (Brock University, Canada):
- Differential Equations (2nd year),
  - Advanced Differential Equations (3rd year).
- May – Aug 2005: Lecturer (ISPU, Russia):
- Geometry of nonlinear differential equations (MSc students),

- Computer methods in geometry of Hamiltonian differential equations.
- Sep 2005 – Dec 2010: Assistant professor, Associate professor (ISPU, Russia):
- Differential Equations (2nd year),
  - Equations of Mathematical Physics (3rd year, see [50]),
  - Functional Analysis (3rd year),
  - Tensor Calculus on Manifolds (3rd year, see [51]),
  - Lagrangian and Hamiltonian Mechanics (4th year, see [49]),
  - $\text{\LaTeX}^2\epsilon$  – Modern Information Technology in Education (3rd+4th year, see [52]).
- May 2009: Lecturer, Utrecht University: ‘Geometric mechanics’ (MSc, see [2, 49]).

Jan 2011 – now: Assistant professor, University of Groningen: <sup>7, 8</sup>	‡ students	Mark	
• Metric and topological spaces (2nd year, see [86]):	ca 120	A+	REN
• Group theory (2nd year):	ca 110	B	
• Linear algebra & ODE systems (2nd year):	50	n/a	REN
• Coding and cryptography (3rd year):	40	A+	
• Geometry of curves and surfaces (3rd year, see [82]):	40	A+	REN
• Graph theory and network flows (MSc, see [87]):	20	A	NEW
• Galois theory (MSc):	10	n/a	
• Fibre bundles and noncommutative geometry (MSc, see [2, 7]):	10	n/a	NEW

(*The interdependence of lecture courses is displayed on pp. 20–21.*)

**QU – Quantum Universe** MSc programme (Groningen, bi-annual):

1a Affine, projective, hyperbolic & elliptic geometry.			
1b Riemannian geometry (see [51]):	40	A+	NEW
1c Poincaré topology (see [80]):	20	A+	NEW
2a Geometry of ordinary differential equations.			
2b Geometry of partial differential equations (see [2, 85]):	25	A+	NL
2c Nonlinear waves.			
3a Lagrangian celestial mechanics (see [49, 77]).	20	A	NEW
3b Hamiltonian mechanics (see [81]):	15	A	REN
3c Global variational problems.			
4a Lie groups, Lie algebras and gauge fields (see [78]):	15	A	NEW
4b Roots, lattices and (quasi)crystals (see [79]):	20	n/a	NEW
4c Homotopy Lie algebras.			

**GQT** – Lecturer in **MasterMath** programme (advanced level M2), Netherlands:

- 2018: Symmetries & conservation laws of nonlinear PDE (45 hours, Amsterdam), see [2, 85].NL  
 2020: Deformation quantization, graph complex & Number Theory (51 hours, Utrecht), NL  
 see [84] and [5, 8, 9].

Oct 2013: Invited lecturer (Taras Shevchenko National University, Kiev, Ukraine):

- Geometry of Lagrangian and Hamiltonian models of field theory (see [64]).

Dec 2018: Lecturer, IMPRS minicourse at Max Planck Institute for Mathematics (MPIM Bonn, Germany):

- The Kontsevich (un)oriented graph complexes (5 hours, see [8, 9, 30, 57, 58]).

<sup>7</sup>Since 2013, courses may be evaluated by students: the mark scale is A+ (highest), A, B, C, and F (lowest).

<sup>8</sup>On the margin, NEW means that the course is new at RuG; NL shows that my course is unique in the Netherlands; REN means that a pre-existing local course is renovated.

- May 2019: Lecturer, 3-day course at Independent University of Moscow (IUM, Russia):<sup>9</sup>
- The Kontsevich (un)oriented graph complexes (10 hours, see [8, 58], [9, 30], and [27, 57]).
- Nov – Dec 2019: Lecturer, 4-day course at the IHÉS (Bures-sur-Yvette, France):
- Symmetries of Poisson brackets: the graph complex and orientation morphism (12 hours, see [8, 58], [9, 30], [27, 57], and [28, 56]).

**Basic Teaching Qualification (BKO).** Awarded by: University of Groningen, NL (2 Jun 2014).

**Professionalisation and trainings (selected):**

- Presentation Techniques (June 2010, Utrecht NL) by Boertingroep.
- Leadership & Management Skills (April 2016, Groningen NL) by HFP Consulting Heidelberg.

Nine graduate schools in Geometry & Quantum Theory and twelve conferences of the GQT-cluster (The Netherlands, [www.gqt.nl](http://www.gqt.nl)) attended in 2014–2023.

**PhD and M. Sci. supervision:**

- [1] *Krutov A. O.*, Deformations of equations and structures in nonlinear models of mathematical physics. PhD thesis, JBI RUG (13 June 2014, Groningen, The Netherlands), 136 p. (Master’s thesis, ISPU, 2009); publications [6, 10, 11, 13, 62, 63, 75].  
Reading committee: acad. A. G. Nikitin (IM Kiev), prof. dr. D. A. Leites (Stockholm), prof. dr. A. C. D. van Enter (RUG).
- [2] *Ringers S.*, Quantization using jet space geometry and Identity management using credential schemes. PhD thesis, JBI RUG (7 October 2016, Groningen, The Netherlands; co-supervised with J.-H. Hoepman), 222 p.; publication [66] and arXiv:1302.4388 [math.DG].  
Reading committee: prof. dr. S. Gutt (UL Brussels), prof. dr. B. De Decker (UC Leuven), prof. dr. G. R. de Lavalette (RUG).
- [3] *Buring R.*, The Kontsevich graph complex action on Poisson brackets and star-products: an implementation. PhD thesis *summa cum laude* (13 October 2022, Johannes Gutenberg–Universität Mainz, Germany), 660 p. (Master’s thesis, JBI RUG, 2017); publications [4, 5, 8, 9, 27, 28, 29, 30, 32, 54, 55, 57, 59] and [1, 73].  
Reading committee: prof. dr. J. D. Stasheff (UPenn), prof. dr. S. Shadrin (UvA Amsterdam), prof. dr. D. van Straten (Mainz).
  - Dissertation prize JGU Mainz (Year 2023).

R. Buring gave talks at the conf. ‘Symmetries of discrete systems & processes’ (3–7 Aug 2015, CVUT Děčín, CZ), at the 8th conf. ‘Group analysis of differential equations & Integrable systems’ (12–16 Jun 2016, Larnaca, CY), at 32nd colloquium GROUP32 on group-theoretic methods in physics (9–13 July 2018, CVUT Prague, Czech Republic), and at the international conference ‘Symmetry & integrability of equations of Mathematical Physics’ (22–23 Dec 2018, IM NASU Kiev, Ukraine). R. Buring presented a poster about [5] at the workshop ‘Homotopy algebras, deformation theory and quantization’ (16–22 Sep 2018, Bedlewo, Poland). R. Buring spoke at the symp. ‘Groningen Deformation Day’ (7 Oct 2016, JBI RUG), at the symp. ‘Advances in semi-classical methods in mathematics and physics’ (19–21 Oct 2016, Groningen, NL), at the GQT cluster schools in geometry & quantum theory (3–7 Jul 2017 and 1–3 Jul 2019, NL), at the graduate school ‘Enumerative invariants from differential graded Lie algebras and categories’ (25–31 March 2018, Montegufoni, Italy), and at two SFB Transregio-45 PhD meetings (26–29 Jan 2018 in Physikzentrum Bad Honnef and 1–3 Feb 2019 in Universität Duisburg–Essen, Germany).

<sup>9</sup>[http://www.mathnet.ru/php/conference.phtml?option\\_lang=rus&eventID=25&confid=1591](http://www.mathnet.ru/php/conference.phtml?option_lang=rus&eventID=25&confid=1591) (in English)

R. Buring gave talks at Junior Math seminar in Oxford (3 May 2017, UK), at the Intercity Number Theory Seminar (7 Apr 2017, Groningen, NL), the Floris Takens dynamical systems seminar (11 Sep 2018, BI RUG), at the Grothendieck–Teichmüller working group seminar (12 Dec 2018 in MPIM Bonn, Germany), and twice at the seminar on the mathematical aspects of scattering amplitudes (9 Jan 2019 and 15 May 2019) in Mainz, Germany.

R. Buring participated in the VIIIth Heidelberg Laureate Forum (September 2019, Germany), where he was selected further –10/200– to be interviewed. In 2022, R. Buring was selected to attend and presented a poster at the workshop ‘Poisson geometry, Lie groupoids and differentiable stacks’ in Banff (5–10 June, BIRS, Canada); he spoke also at the 34th International colloquium on group theoretical methods in Physics (GROUP34, 18–22 July in Strasbourg, France). R. Buring visited the IHÉS during the weeks 18–22 April 2017, 9–13 December 2019, and 28 Nov – 2 Dec 2022.

**Realised PhD themes:**

- Lie algebroids over infinite jet spaces (ISPU, 2008–2009): papers [12, 14, 15, 68, 70] and [10, 67].
- Intrinsic regularisation of the Batalin–Vilkovisky formalism (JBI RUG, 2011): papers [64] and [33, 61].
- The lift of deformation quantisation to Poisson field models (NWO 2011): papers [31, 64].
- Calculus of variations in the noncommutative geometry of cyclic words (GQT 2011/12): papers [7, 34] and [3, 65].

- [11] *Jagoe Brown M. S.*, Kontsevich’s graph flows of Nambu-determinant Poisson brackets in 4D: their (non)triviality. Master’s thesis, BI RUG, 2023–25 (in progress).

M. Jagoe Brown will give two talks: at the conf. ‘Integrable systems & quantum symmetries – ISQS28’ (1–5 July 2024, CVUT Prague, CZ) and at Poisson seminar (27–28 June 2014, Nijmegen & Utrecht).

- [12] *Schipper F. M.*, Kontsevich (micro)graph invariants in the geometry of Nambu–Poisson brackets: their nature and constraints. Master’s thesis, BI RUG, 2023–24 (in progress).

F. Schipper will give a talk at the conf. ‘Integrable systems & quantum symmetries – ISQS28’ (1–5 July 2024, CVUT Prague, CZ).

***Bachelor supervision (selected):***

- *Golovko V. A.*, On geometric properties of the Toda equations associated with the semisimple Lie algebras. Lomonosov MSU (2002–2003) Moscow, Russia; cf. [24].
- *van Breukelen R.*, Topological and non-topological solitons, JBI & VSI RUG (2012) Groningen, The Netherlands.
- *Boer M.*, Lie algebras and the transition to affine Lie algebras in 2D maximal supergravity, JBI & VSI RUG (2012/13) Groningen, The Netherlands.
- *Bouisaghouane A.*, Finding new digits to replace  $A$ – $F$  in the hexadecimal numeral system, JBI RUG (2013) Groningen, The Netherlands. — Problem 3.3 from [53].
- *Hakvoort K. J. D.*, Classical tests for very special relativity, JBI & VSI RUG (2014) Groningen, The Netherlands.
- *Griffioen S.*, Maximizing colour difference in metro maps, JBI RUG (2014) Groningen, The Netherlands. — Problem 3.2 from [53], cf. [45].
- *Elbers W.*, Non-linear realisations of supersymmetry, JBI & VSI RUG (2016), Groningen, The Netherlands.
- *Mifsud P.*, Knot theory, the Jones polynomial and Chern–Simons theory, JBI & VSI RUG (2018), Groningen, The Netherlands.
- *Rutten N. J.*, Unoriented and oriented Kontsevich graph cocycles: Finding infinitesimal deformations of Poisson structures, JBI RUG (2018), Groningen, The Netherlands; cf. [8, 30, 58, 59].

N. Rutten gave four talks: at the conference SDSP IV ‘Symmetries of discrete systems & processes’ (12–16 June 2017, CVUT Děčín, Czech Republic), 22nd summer school ‘Global analysis & applications’ (21–25 August 2017, Jagiellonian University in Krakow, Poland), at 27th winter school on Mathematical Physics (22–26 January 2018, Janské Lázně, Krkonoše, Czech Republic), and 32nd colloquium GROUP32 on group-theoretical methods in physics (9–13 July 2018, CVUT Prague, Czech Republic).

- *Kleinsmit A. A. T.*, Probability of magnon decay when scattering off magnetic domain walls, ZIAM & BI RUG (co-supervised with prof. M. V. Mostovoy, 2019), Groningen, The Netherlands.
- *Kerkhove S. S.*, Drawing the Kontsevich graphs in  $\text{\LaTeX}$ , BI RUG (2020), Groningen, The Netherlands; cf. [44, 76].
- *Lipper D.*, A hidden symmetry of Kontsevich’s tetrahedral flow on the space of rescaled 3D and 4D-determinant Nambu–Poisson brackets, BI RUG (2021), Groningen, The Netherlands; cf. [4].
- *Malai V.*, Local and global symmetries of PDEs, VSI & BI RUG (2022), Groningen, The Netherlands.

### List of publications

In 2011–15 in Groningen (NL) I was under contract<sup>10</sup> to key-author **2** articles per year in conference proceedings or journals; the overall number of my publications must be at least **3** per year on average. I had **15**: namely [10–12, 33–34, 49, 53, 62–69].

In 2016–20 in Groningen (NL) I was under contract<sup>11</sup> to key-author **2** articles per year in conference proceedings or journals; the overall number of my publications must be at least **3** per year on average. I had **19**: namely [5–9, 27–32, 45, 56–61, 75], and one interview.

Since 1 June 2023, current version of tenure-track criteria at FSE RuG abolished the previously agreed norms and principles of evaluation for promotion — by introducing new ones.<sup>12</sup>

In 2021–24, journal publications are [4, 5, 27] and [54, 55], see also [77–79] and [84–87].

### Preprints

- [1] *Buring R., Kiselev A. V.* (2022) Kontsevich’s star-product up to order 7 for affine Poisson brackets: where are the Riemann zeta values? 74 p. *Preprint arXiv:2209.14438* [q-alg]
- [2] *Kiselev A. V.* (2012) The twelve lectures in the (non)commutative geometry of differential equations, *Preprint IHÉS/M/12/13* (Bures-sur-Yvette, France). — 140 p.
